

How to map NSD2COCO image ids to grab image captions

[!NOTE]

These files should not be distributed. Those files are only for the purpose of completing CSAI 2025 assignments.

The actual source of these files are agreed and downloaded from: <https://naturalscenesdataset.org/>

The required components are:

- NSD stimulus decription files
- COCO annotations files

Filenames to the desired components

- "nsd_stim_info_merged.csv"
- COCO annotations: http://images.cocodataset.org/annotations/annotations_trainval2017.zip

Python script is attached to extract such captions for NSD ID: 7 Required packages to be installed to run the script `pycocotools` , `pandas`
